Legal Disclaimer

We recommend reading this whitepaper before deciding to purchase a PRVC Token. PrivaCoin will do its best to achieve what is stated on its roadmap, tokenomics, and the like declared in this whitepaper.

In the event of unexpected circumstances, PrivaCoin reserves the right, to modify, add, or remove parts of this whitepaper. During those cases, rest assured that our decision will prioritize and will place our community's interest above all. Also, it is the purchaser's responsibility to research the laws binding cryptocurrencies, such as PrivaCoin, in their localities.

For any loss or harm originating from the use of this website's material, including written material, links to third-party sites, and data such as quotes and charts as well as buy/sell signals. PRVC token will not be held responsible for any damages. Understand the risks and costs associated with trading assets on the financial market (digital or otherwise). ICOs, in particular, are one of the riskiest investment choices available to investors

Introduction

Privacy is recognized as an individual human right. Information privacy is crucial to the broader right to privacy. It has to do with a person's capacity to decide for themselves when, how, and why others handle their personal information. To ensure human dignity, safety, and self-determination, privacy must be protected. People are able to freely create their own personalities. As it makes it easier to exercise other human rights including the freedom of expression, of thought, conscience, and religion, of assembly and association, and of being free from discrimination, the right to privacy is also acknowledged as an enabling right. It acts as the cornerstone of a democratic society in this way

About Privacoin

The purpose of PrivaCoin is to pave the way for research on new ideas and to invest more in the work which ensures privacy using high-tech technology. Privacy is the foundation of our study, which explores technological innovation for the purpose of policy analysis. PrivaCoin supports the right to privacy, prevent accessing the personal data, complying with applicable data protection laws. Our project prevents the government from spying on people (for no reason). PrivaCoin prevents groups from using personal data for their own purposes. Our project helps ensure that those who steal or misuse data are held accountable. PrivaCoin helps maintain social boundaries and build trust. The PrivaCoin project allows you to freely engage in politics, protecting freedom of speech, thought and reputation

Fairer Launch

PrivaCoin tokens are sold to every participant fairly. The tokens are fully available to everyone for purchase at the same price.

Unlike other currencies that only focus on marketing, we created a token that helps merchants and ordinary people to have their money and investments in their wallet regardless of the amount they want to have in a digital way and with the ambition of being able to have the digital world and the virtual world in one click, we are based on the community and for the community, backed by a strong development team.

Our Mission

The major goal of the PrivaCoin is to provide privacy to ensure the protection of your finances and control over our data. Concerns about protecting privacy, especially of online data, have been a goal of PrivaCoin developers for years. Since most data is transferred online, many tools focus on the online environment. However, when privacy is invaded and data misused, the consequences, including emotional effects, extend beyond the online space and into the offline world. Thus, we developed PRVC, the token of Privacy Concern.

Our Vision

Privacy is not an option and should not be the price we accept for our presence on the Internet. It's not something we're just entitled to, it's an absolute requirement. But nowadays data privacy seems to be disappearing from the internet due to many cyber security attacks.

There is no point in being an individual without privacy. So let's own our privacy, protect our lives and families because it is our absolute right. Holding is employed as a less resource-intensive mining option. It comprises depositing funds in a cryptocurrency wallet to fund the protection and operation of a blockchain network.

Simply explained, holding is the process of securing cryptocurrency in order to earn incentives. To optimize their benefits, investors can validate PrivaCoin and keep their tokens on the smart exchange. The longer investors stay on the exchange and invest in tokens, the greater their benefit.

Core Values

We are committed to providing a safe environment for investors to grow their wealth and reach financial freedom.

We value honesty above all else and promise to always do the right thing for our investors, our clients, and our partners, to achieve mutual success.

PrivaCoin will publish all relevant wallet addresses, including management team wallets, locked liquidity in a third party secured locker on time, and communicate all major business decisions with the community.

Why PrivaCoin?

OPEN FOR GLOBAL PARTICIPANTS

- We facilitate the transaction and bring them closer to a wider audience. An added benefit of use is that it's completely decentralized, so trading can be done freely across borders.
- The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. It has no border so these can be used no matter where you are located globally.
- This also has a huge effect on international payment fees. Traditionally international transfers have much higher fees than domestic transfers and payments. International payments and transfers with crypto are the same as domestic.

FREE FROM CORPORATE INTERFERENCE

- PRVC token transactions have no intermediary institutions or government involvement, and the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization and waiting period requirements.

SAFE & SECURE

- It is a safe and secure platform that is continuously improving the security of the system to ensure the safety of the platform.

Benefits

Payment Widget

The payment widget will allow websites to easily accept payments in multiple tokens and Custom Coins on any website. The widget may be connected to any Payment Gateways to the PrivaCoin

No Built-In Fees

Other than very small transaction fees, complete payment gateways can be created and no built-in fees or costs are imposed.

Native Support

The Gateway smart contract can be configured to accept all multiple coins or a list of specific token types.

Build your own customized Gateway

As a provider, you can implement your own desired features, such as web invoices, email/SMS notifications, refunds, and more by building on the open-source code and examples provided in the PrivaCoin token.
